

Still In ChargeSM

THE FIVE PRINCIPLES · KEEP THIS BY YOUR SCREEN

AI is a powerful tool, but a tool doesn't think, decide, or lead. You do.

1

Think Better

Use AI to sharpen your reasoning, not replace it.

2

Protect Privacy

Never put personal or sensitive info into an AI tool.

3

Verify Outputs

Confident-sounding is not the same as correct. Check it.

4

Follow the Rules

Know what's allowed before you use AI for any task.

5

Pause and Ask

When something feels off, stop and ask a teacher or adult.

Your judgment is what makes you valuable.
AI is a tool, and you are the one in charge. Always.
